Introduction

Metro Go is a mobile application developed to make metro travel in Cairo easier and more efficient.

With the growing number of metro users, there's a need for a smart and helpful tool to assist in planning trips and accessing important metro information.

This presentation will walk you through the features and user interface of Metro Go.

About App

- A mobile app for navigating Cairo's metro system.
- Helps find the nearest metro station via GPS.
- Allows users to select start and end stations.
- Calculates ticket prices based on the route and number of passengers.
- Includes a full metro map for easy navigation.
- Simple, fast, and user-friendly design.

Splash & Home Screen

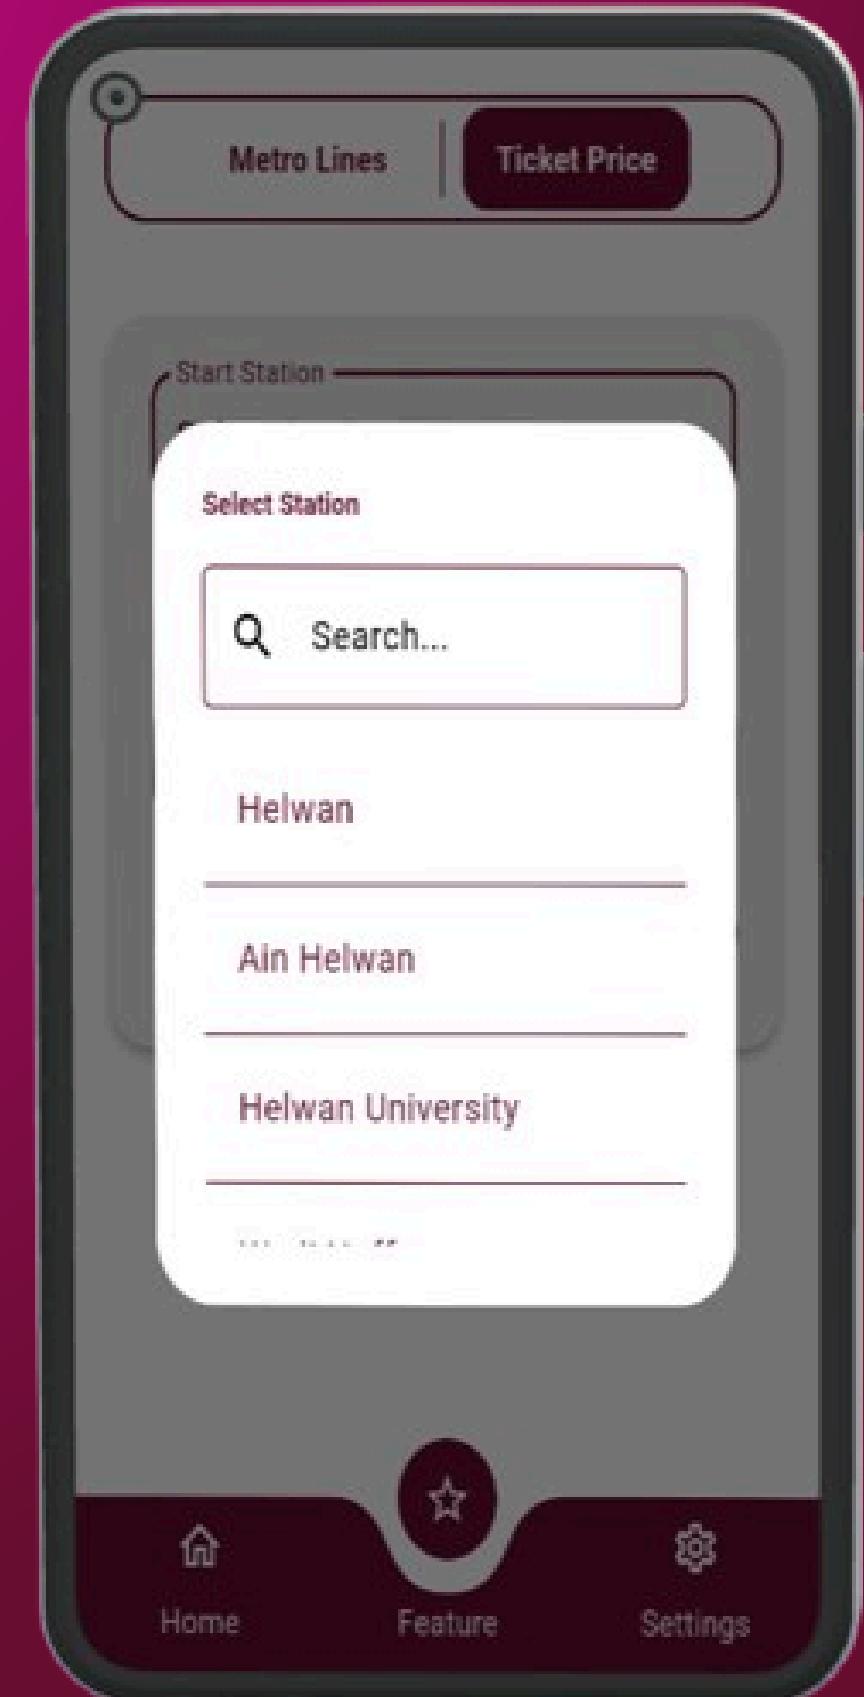

- **Splash Screen:** Displays app branding and logo for a sleek and professional welcome.
- **Home Screen:** Allows users to select their start and end stations and get trip details.

Station Search

- It uses autocomplete functionality to reduce typing effort and help users find stations faster.
- It also helps avoid spelling mistakes by listing accurate and existing station names.
- The suggestions list updates dynamically with each new character entered.

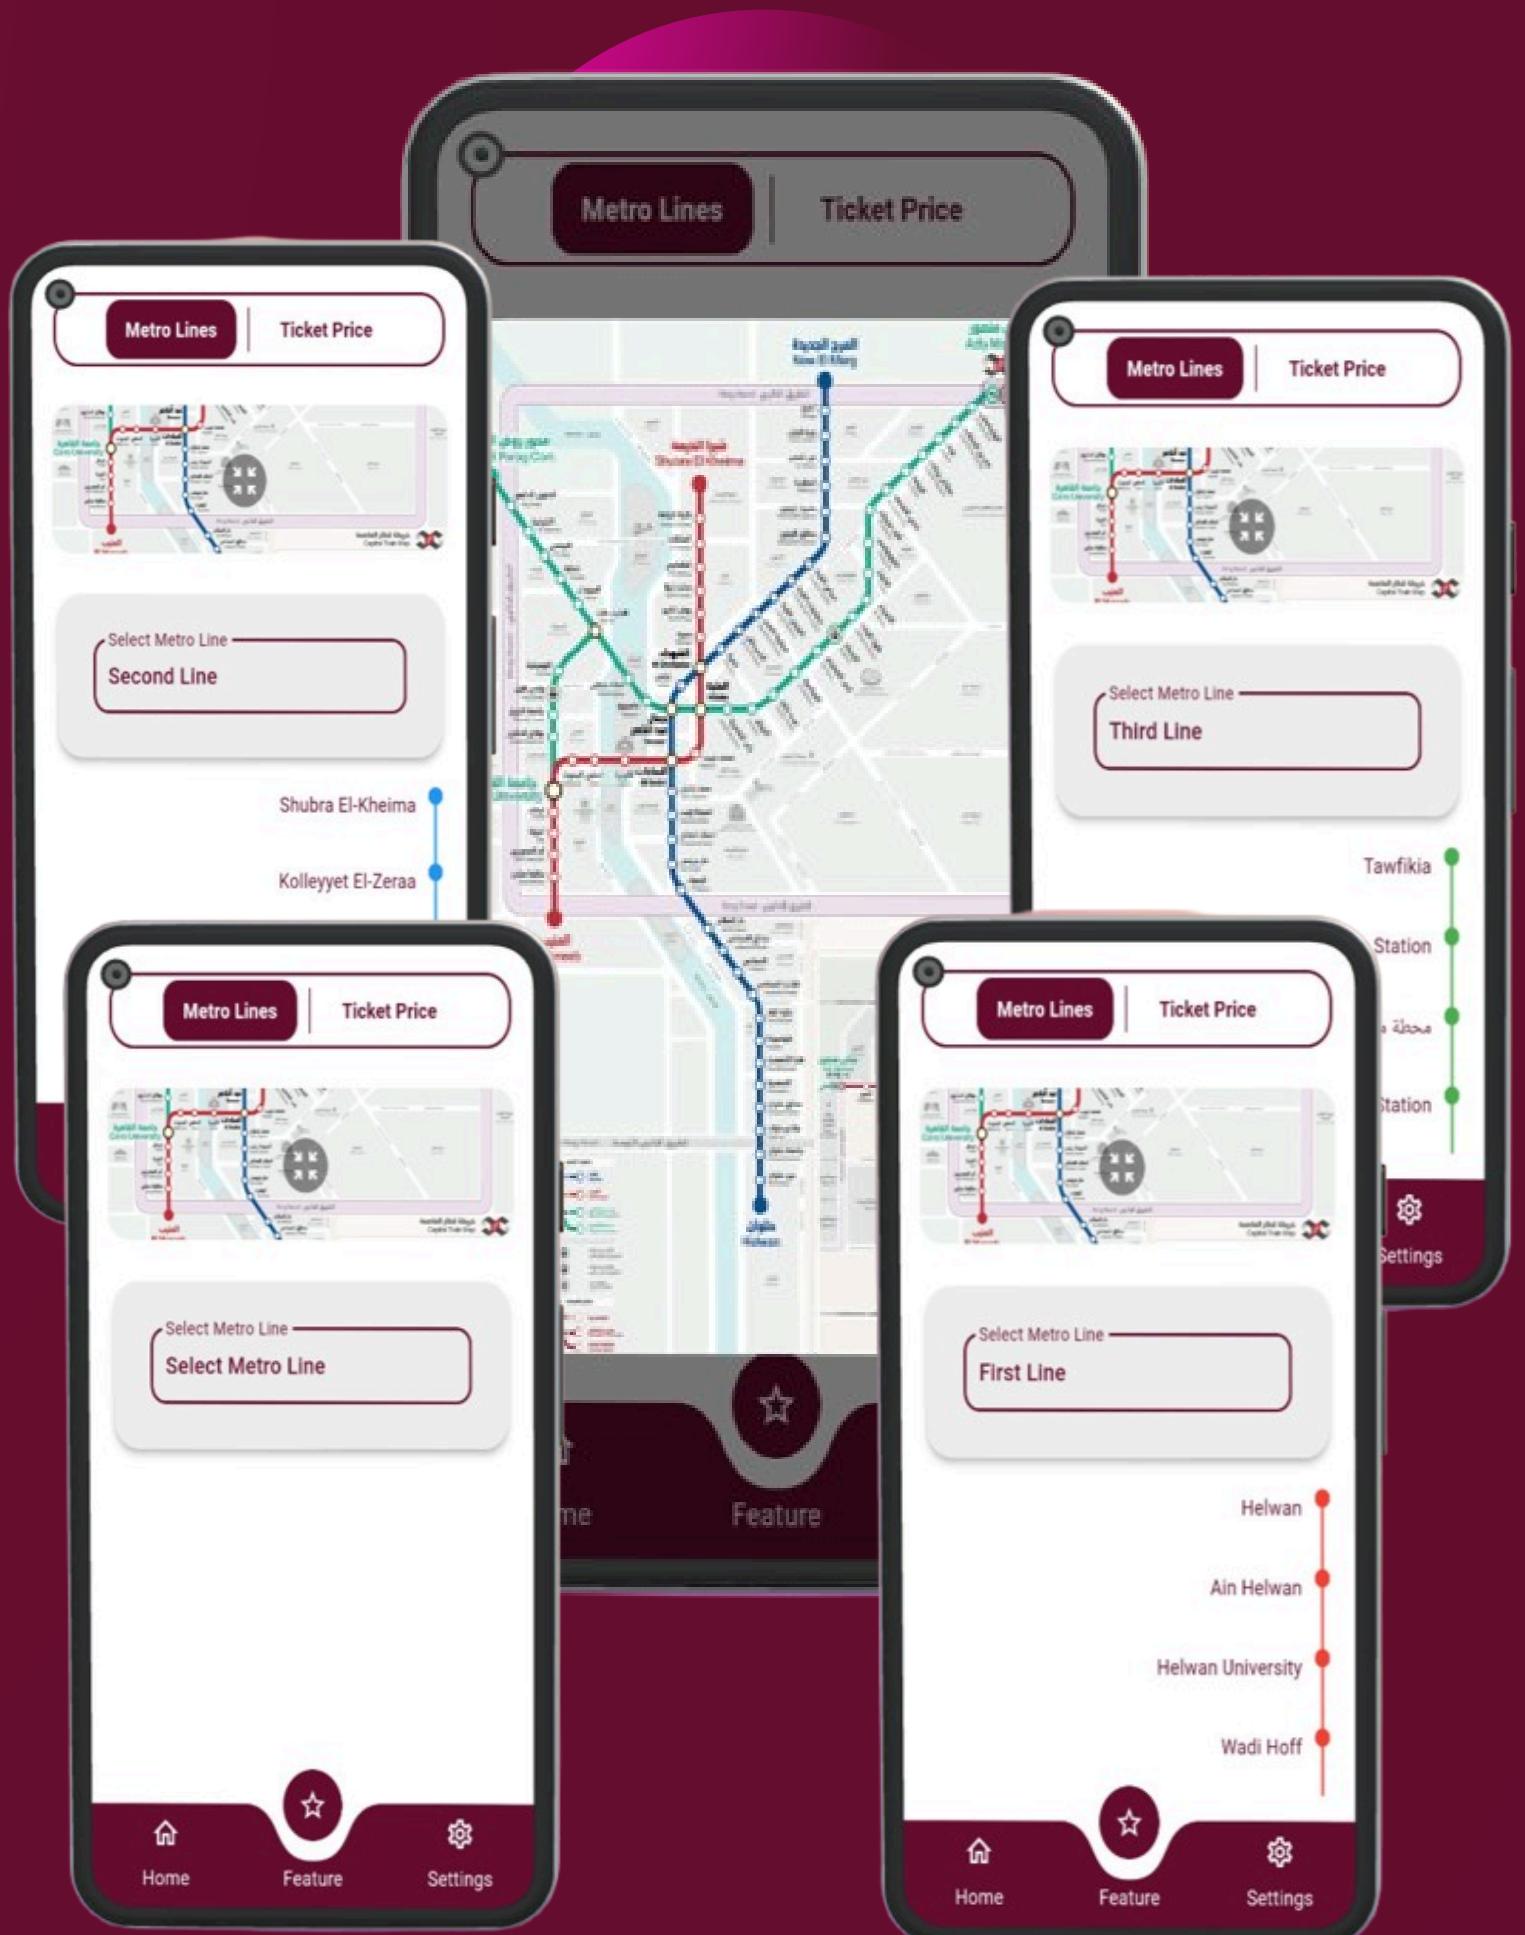

- Implements a dynamic station search with suggestions as the user types.
- The feature improves usability, especially for users who are not familiar with all station names.

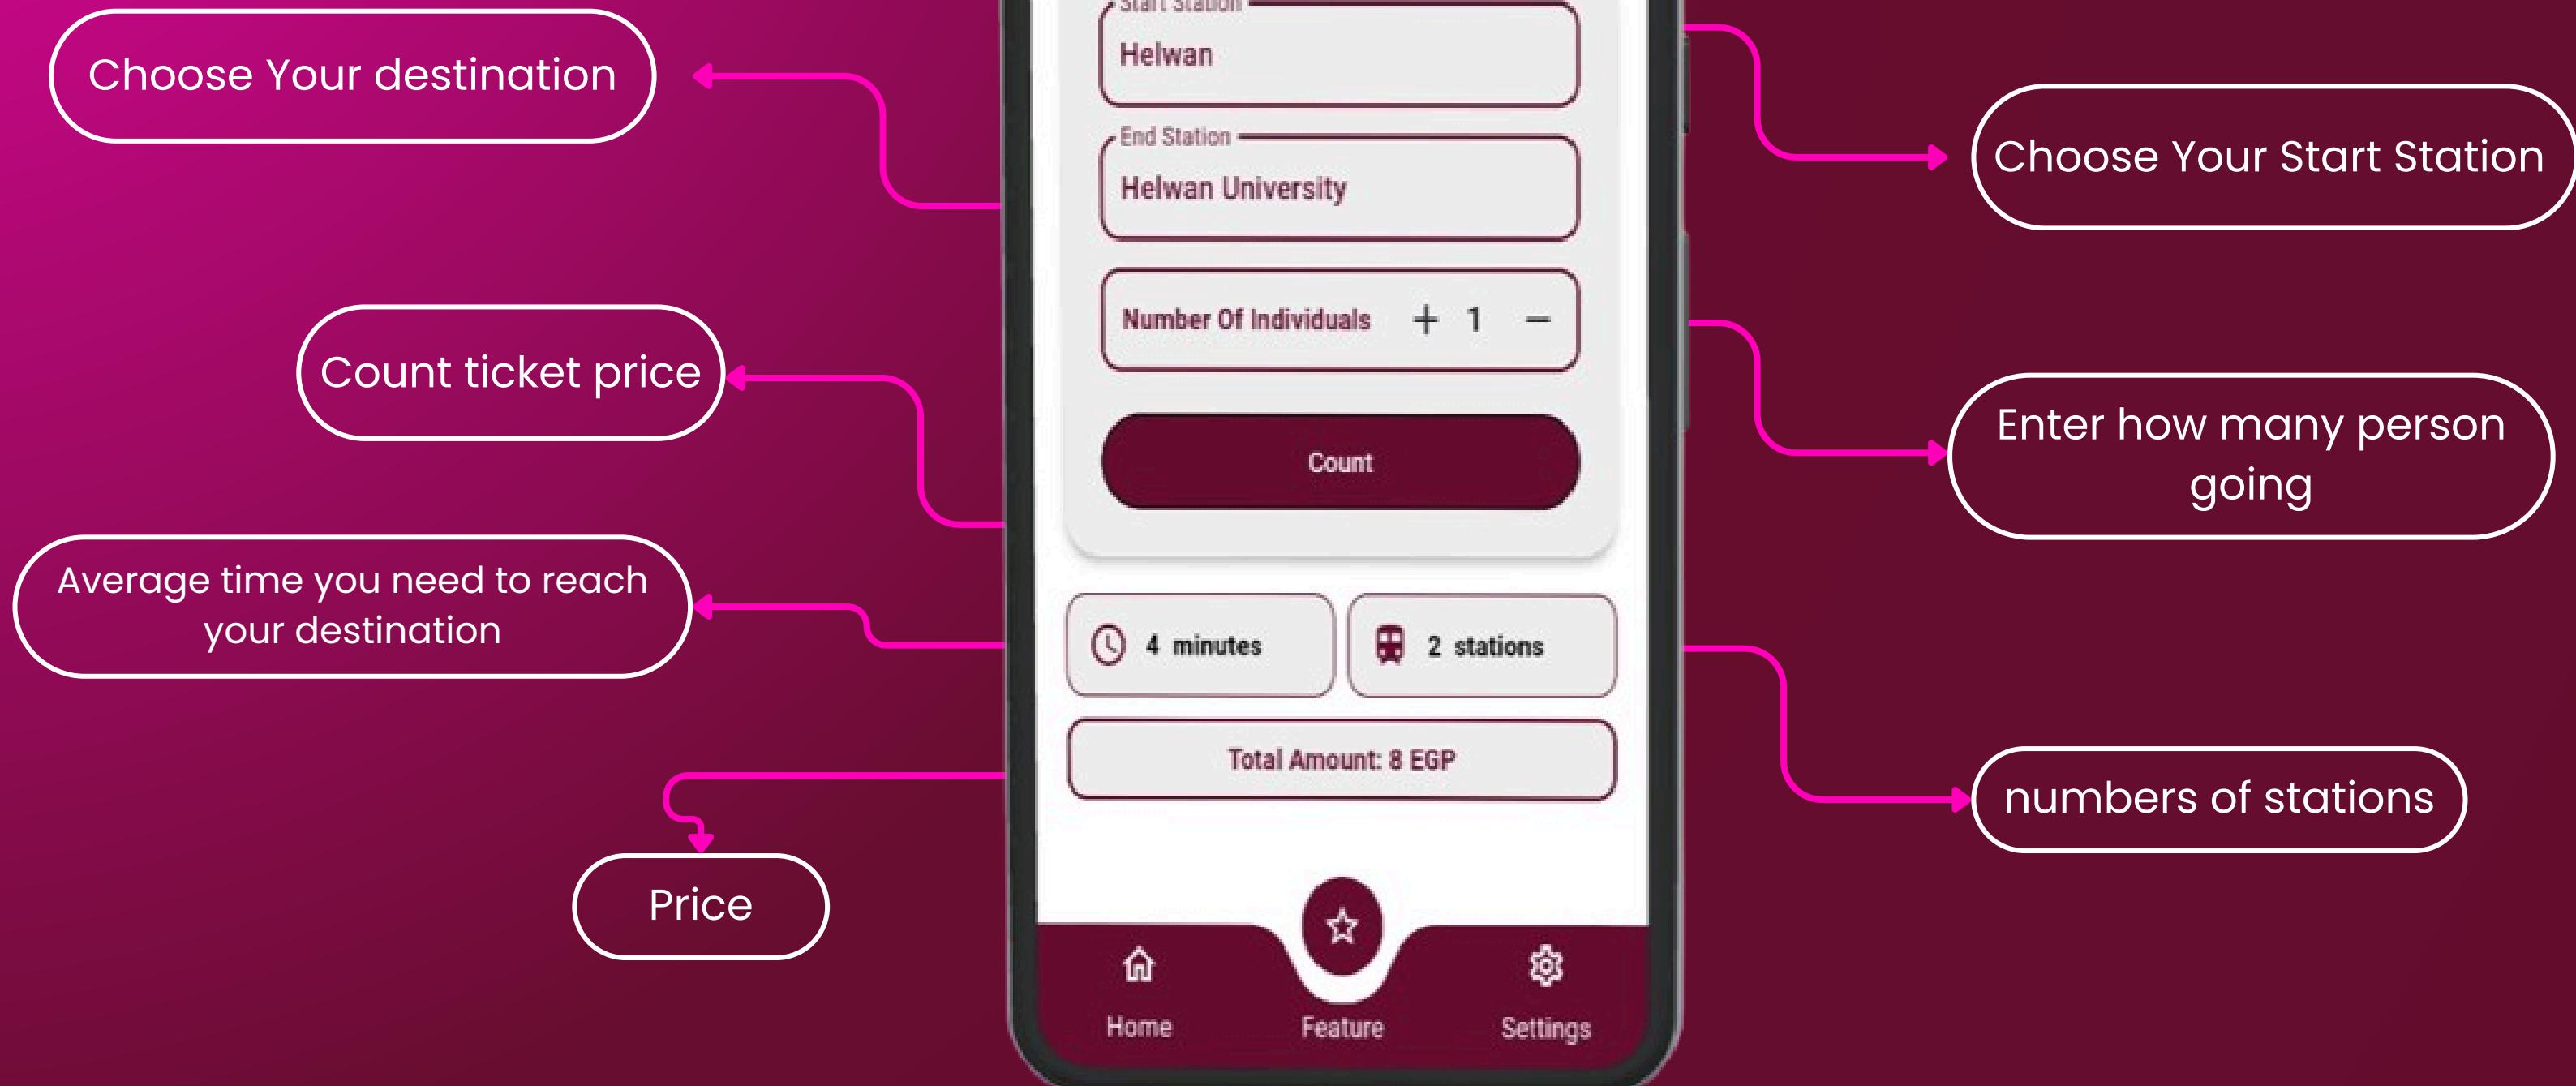

Metro Map Viewer

- Offers a detailed and interactive view of all metro lines.
- Users can easily find connections between stations.
 - Screens Shown: 4th screen (map view)

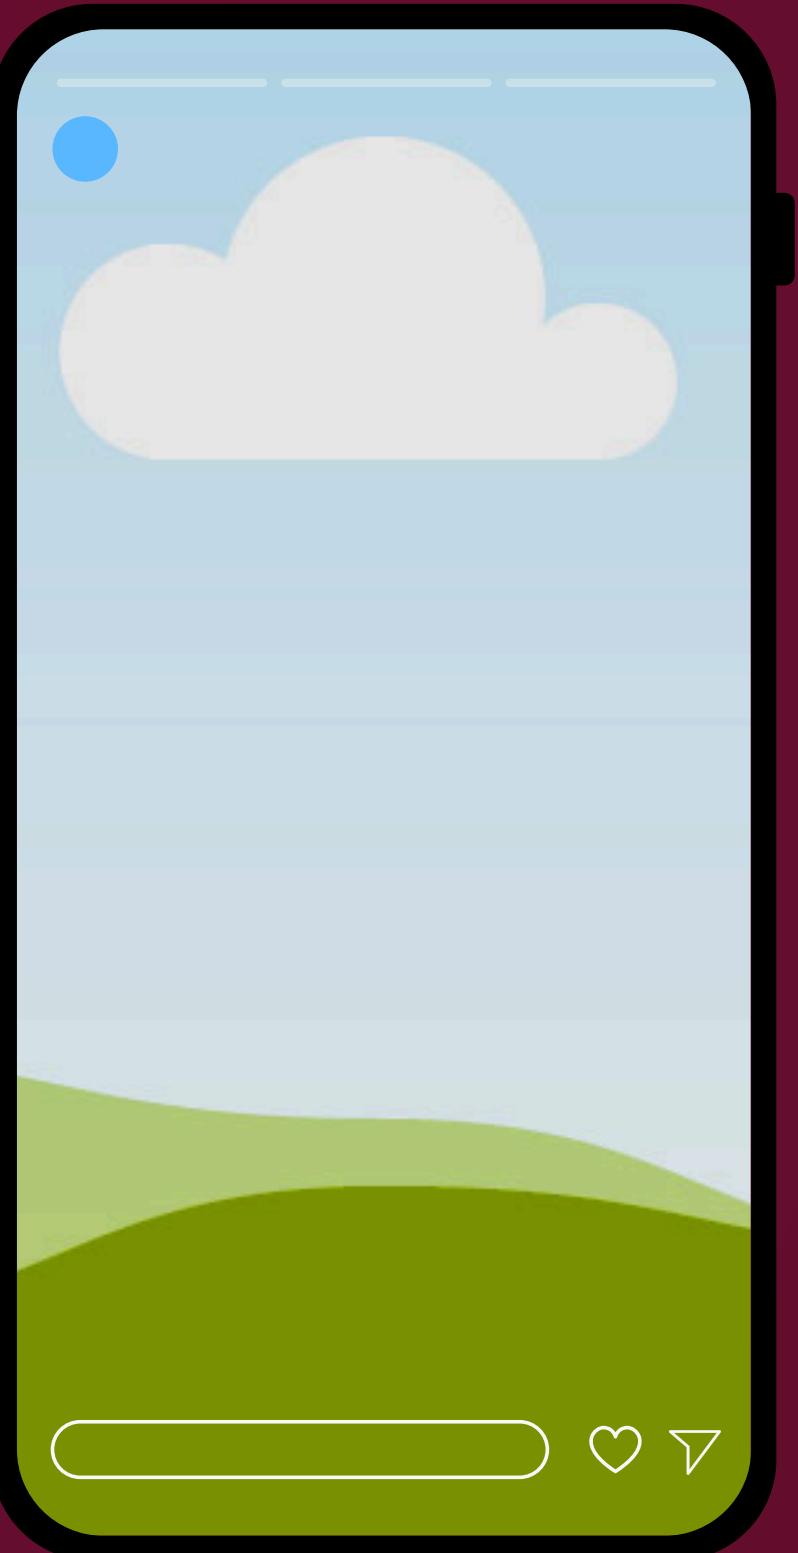

Ticket Price Feature

Settings Screen

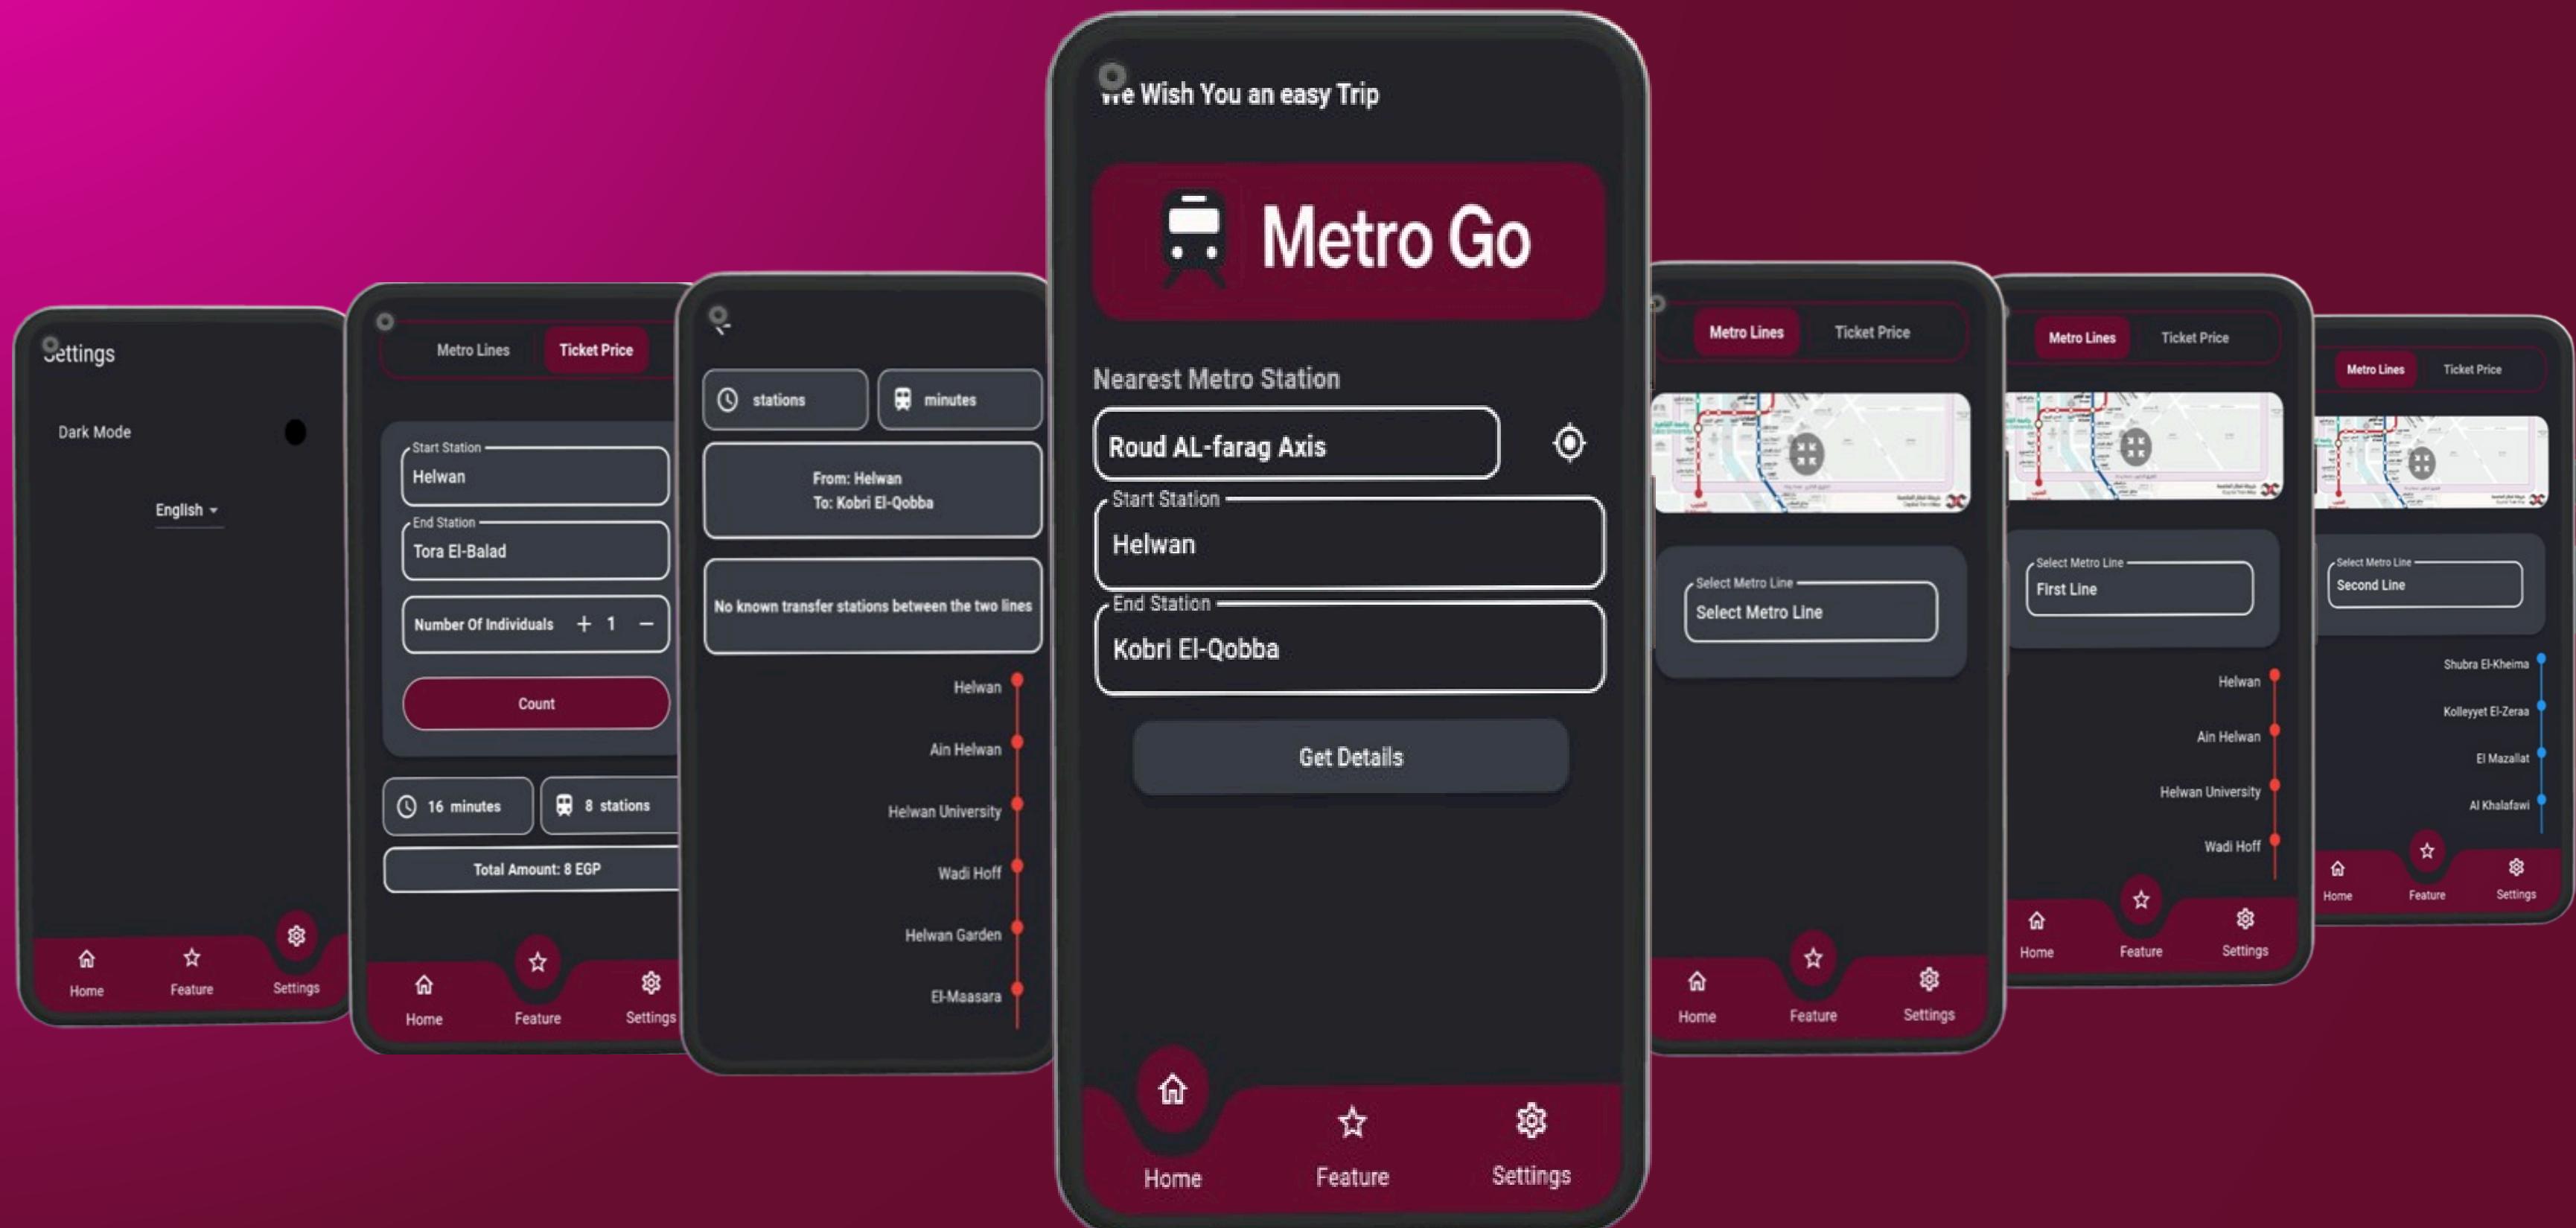

- CHANGE THEME:
 - Change Theme: Switch between light and dark mode to suit user preferences and reduce eye strain.
- Change Language
 - Toggle between Arabic and English for bilingual support

App Dark Theme

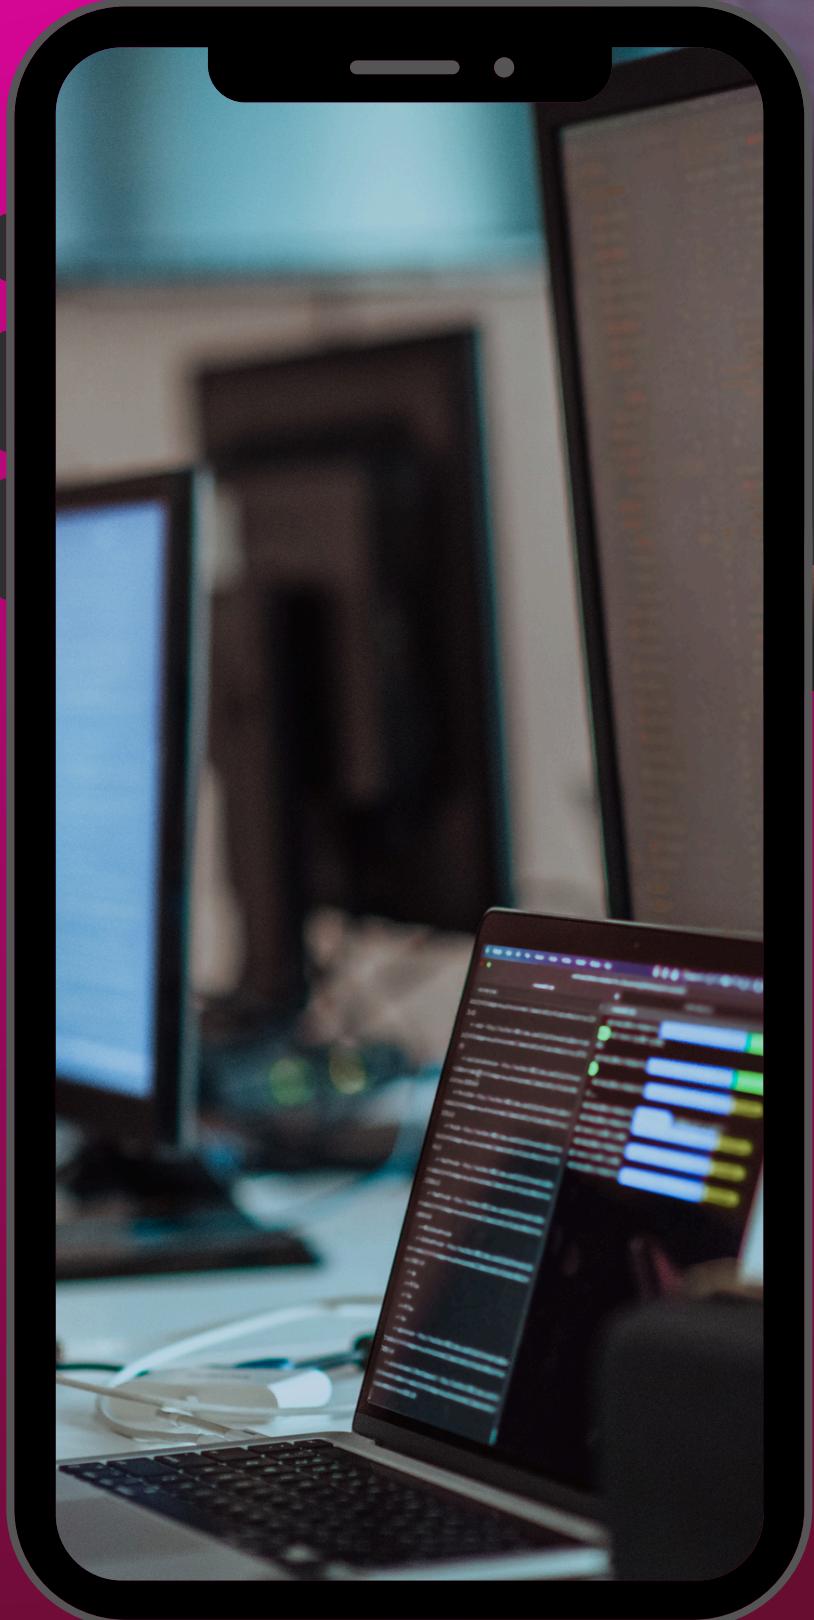

Metro Go supports both Light and Dark Themes to enhance usability in different lighting conditions.
